

LeatherZ Door Armrests

NOTE: Installation is permanent. After installing a LeatherZ Door Armrest, it will be very difficult to remove it. Removal may cause damage to your car. The plastic base of your door panel may be discolored by removal of the 3M tape. LeatherZ does not assume any responsibility for damages caused by removal of the Door Armrests.

Installation

1. Brush any loose dirt off of the surface of your door interiors. Prepare the surfaces for the LeatherZ Door Armrests with isopropyl alcohol. I have been successful using 70% isopropyl alcohol. Stronger concentrations are not recommended.
2. Test fit the LeatherZ Door Armrests in place without removing the protective backing on the 3M tape. They should be spaced about 1/4" back from the edge of the plastic door armrest. The curved side of the LeatherZ Door Armrests face outwards.
3. Remove the protective backing on the 3M tape and press the LeatherZ Door Armrests into place. Apply constant, steady pressure over the entire surface of the Armrests for 10 seconds. After application, 3M claims it takes 72 hours at 70 degrees Fahrenheit for the adhesive to fully cure.

Care Instructions

The most important factor that effects the life of leather is cleanliness. You should try to keep your LeatherZ Door Armrests (and all of your factory leather) as clean as possible. At least once per month, you should wipe the leather with a damp cloth and pat it dry with a soft cotton diaper. Tiny dirt particles rubbed into the surface of the leather will make it shiny and eventually thin the leather and cause cracks. Keeping the leather surface clean will prevent this. Every 6 months, you should treat the leather with Spinneybeck Leather Conditioner. Every 12 months, you should treat the leather with Spinneybeck Leather Cleaner, followed by a treatment of Conditioner. The Spinneybeck leather maintenance products were specifically designed for the leather I use. I sell the Spinneybeck kit, or you can buy it directly from Spinneybeck by calling (800) 482-7777.

Customer Satisfaction

If you like my work, please drop me a line and let me know. Tell other Z3 and M owners. If you are not happy with my work, let me know. Let me make it right for you. -- Jon Maddux
